Energy production in Europe
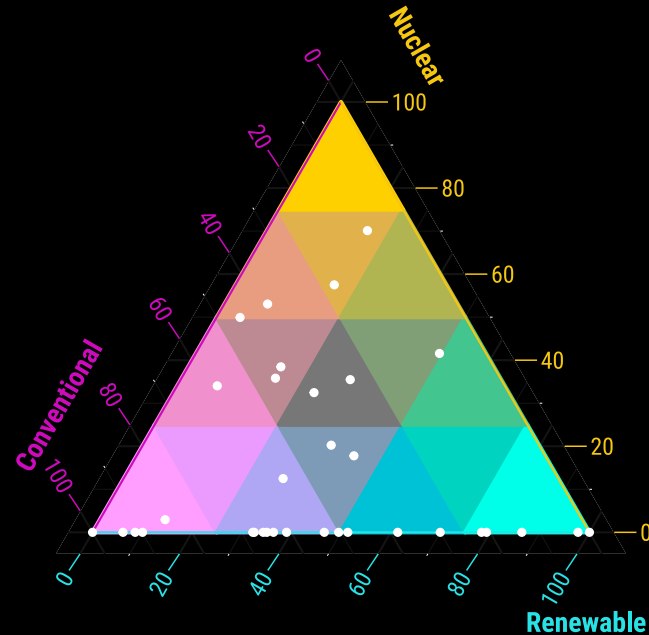

Each country's energy production is ternary colorcoded to represent the proportions of energy produced using Conventional, Nuclear power plants, and Renewable sources. The size of labels is scaled to the total yearly production.
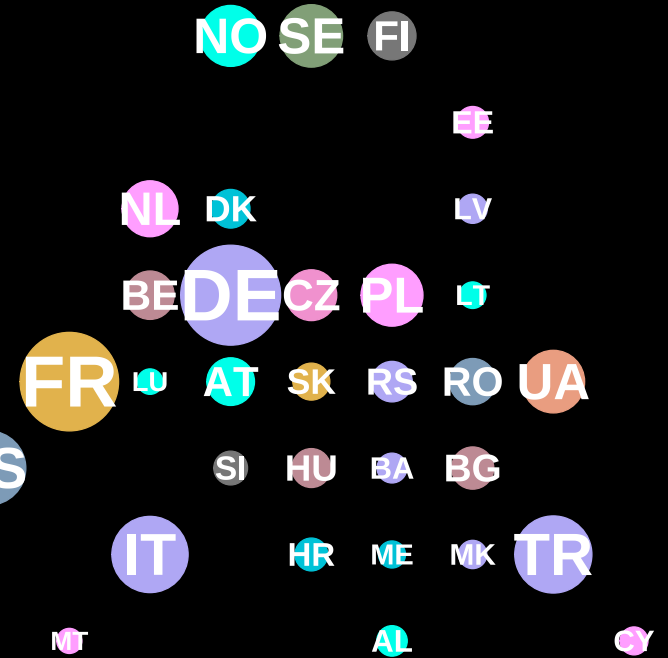

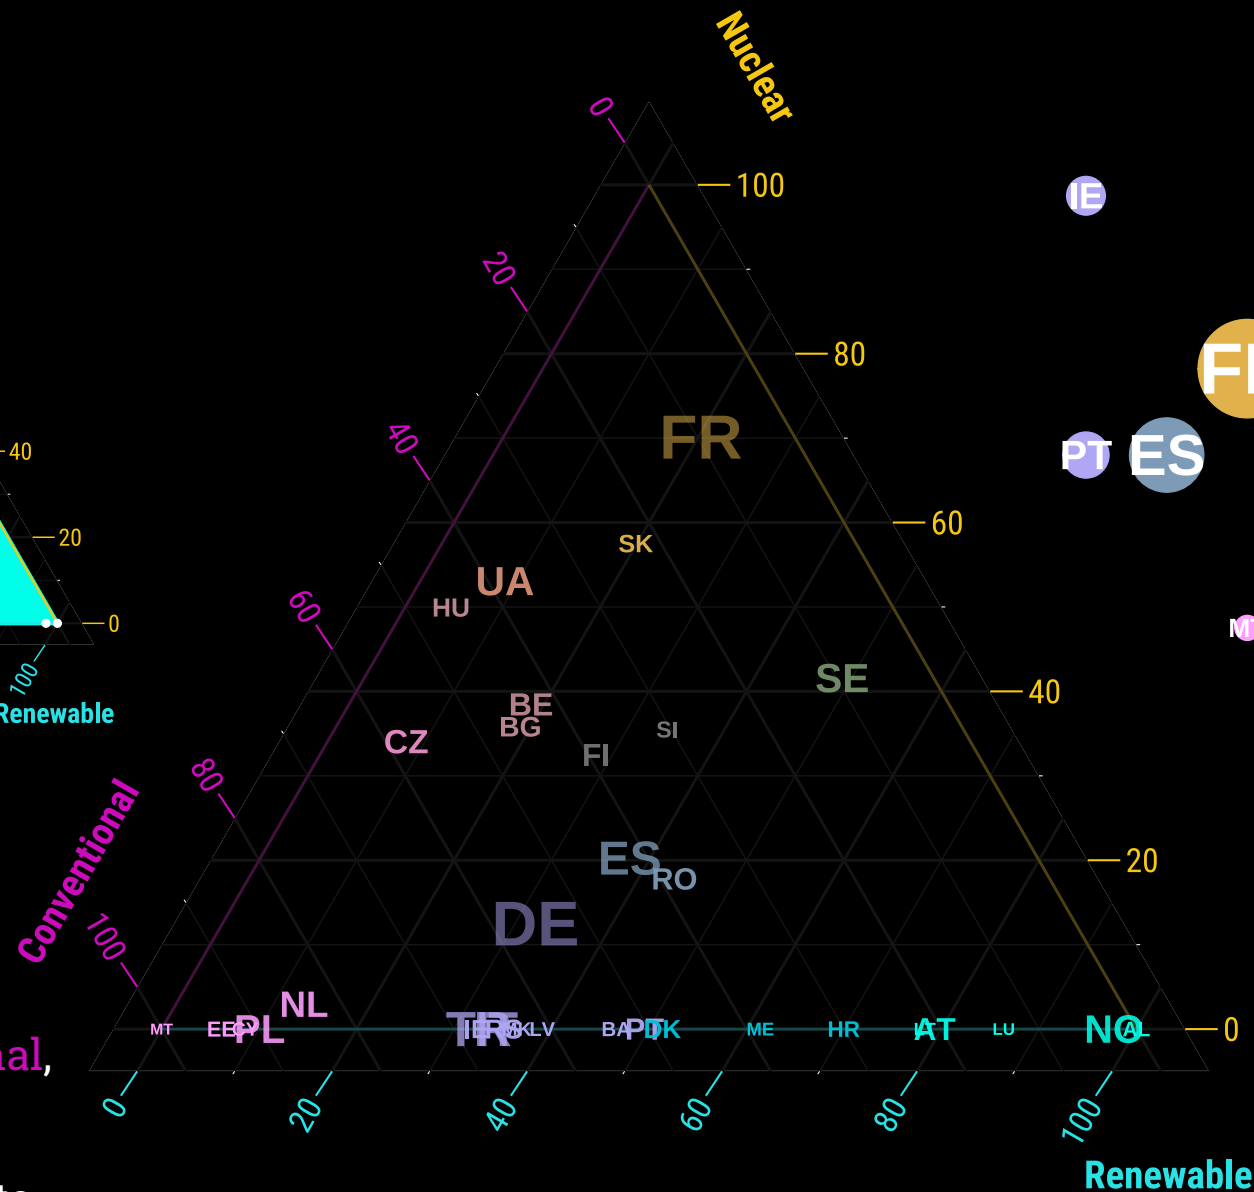

Geofaceted bubble chart. Each bubble is scaled to the total yearly energy production of the coutry. Colors are the same as in the ternary plots.

{tidyverse} {ggtern} {tricolore} {geofacet} {ggdark}
